OBJECTIVE

To contribute to the success of a business by utilizing data analysis techniques, specifically focusing on **time series analysis**, to provide valuable insights and accurate **sales forecasting**.

DESCRIPTION

1. **Dashboard Creation:** Identify the KPIs, design an intuitive and visually appealing dashboard, add interactive visualizations and filtering capabilities to allow users to explore the data at various levels of granularity
2. **Data Analysis:** Provide valuable insights to business entities regarding the effectiveness of their sales strategies through visualization and charts
3. **Sales Forecasting:** Leverage historic data and apply time series analysis to generate sales forecasts for next 15 days
4. **Actionable Insights and Recommendations:** End goal is to share valuable insights and actionable information that can drive strategic decision-making and support the supermarket's goals for growth, efficiency, and customer satisfaction

PROJECT INSIGHTS

- **Payment Modes:** Cash on Delivery is the most used, followed by Online Payment and Cards.
- **Regional Sales:** West region leads with 33% sales; California is the top-performing state.
- **Sales by Segment:** Consumer segment accounts for 48% of total sales.
- **Monthly Trends:** December has the highest sales; October records the highest profits.
- **Category Analysis:** Office Supplies is the top category; Phones lead among sub-categories.
- **Shipping Modes:** Standard Class is the most used shipping mode.

CONCLUSION

- This Power BI project provides actionable insights into sales trends, customer preferences, and regional performance.
- Key findings highlight opportunities to boost profits through targeted promotions, optimize shipping strategies, and focus on high-performing categories and segments.
- These insights can drive informed decision-making and enhance overall business growth.

Thank you 😊
